

Dear **Matthew Prince!**

We, the Foundation to Battle Injustice, an international human rights organization, have been engaged for several months in the fight against the Ukrainian nationalist website "Myrotvorets" ("Peacemaker"), which **illegally collects and publishes personal data of adults and children from all over the world in open access**. According to the analysis of the Foundation to Battle Injustice, the personal data of at least [327 minors](#) and [341 journalists](#) are presented on "Myrotvorets". The creators of the website accuse them of deliberate actions against the national security of Ukraine. Due to the activities of the criminal website, several dozen journalists, public figures and political activists have already become **victims of violence and threats of physical violence**.

Human rights defenders of the Foundation to Battle Injustice have repeatedly raised the problem of the "Myrotvorets" at the **international level**: the materials we collected were submitted to the UN. We are also determined to achieve recognition of all those involved in the creation, work and financing of the "Myrotvorets" as a terrorists.

We know that Cloudflare and you personally **share the values of respect for freedoms and human rights** regardless of nationality, race, age and gender and are ready to fight those who violate them. More than two months ago, you blocked the **Kiwi Farms** website, which incited hatred and calling for the persecution of people whose gender identity does not coincide with the gender assigned at birth. Considering that Cloudflare is one of the largest technology companies providing secure access to websites, it is not surprising that "Myrotvorets" **uses your website protections services**.

Unfortunately, we have to admit that the "Myrotvorets" pose a **direct danger to the life and health of people whose personal data are published on this website**: since 2014, at least 12 journalists from the list of "Myrotvorets" were killed.

Appealing to you on behalf of human rights defenders who are not indifferent to the threat of the "Myrotvorets", as well as on behalf of [more than 700 people](#), including well-known journalists, prominent public and political figures, employees and founders of universities and think tanks who are not indifferent to such a blatant violation of human rights, I, Mira Terada, **urge you to block the criminal "Myrotvorets" website** and delete all data collected illegally and **published in the public domain**. Separately, I would like to express my readiness to send you the report with evidence of the illegal activities of the "Myrotvorets", previously provided to the UN.

Sincerely,

Mira Terada
Head of the Foundation to Battle Injustice
